WATER OUTAGE **PREPARATION SUGGESTIONS**

- No matter how extensive our planning and preparation, work on water lines is an inexact science
- Unforeseen complications are often the rule rather than the exception
- In order to minimize the inconvenience you will experience during a water line repair or replacement, SWSD would like to suggest some basic steps of preparation:
 1. Prior to the water shut-off, fill containers of water in your kitchen to use for drinking and cooking
 2. Fill your bathtubs with water and have a plastic pitcher or bucket at hand in the bathroom to use for flushing toilets
 3. If you need to shower during a water outage you are always welcome to use the Snowmass Recreation Center. Simply mention your address at the desk and let them know you are in a water shut-off zone. Remember you will need to take your own towel and toiletries.

We hope these simple preparations will help minimize the inconvenience you, your family, and your guests experience.
Thank you!
