

BEARS and BIRDFEEDERS

IMPORTANT CONSIDERATIONS

- Bears love to eat BIRDSEED and HUMMINGBIRD NECTAR
- Birdfeeders are a repeat cause of bear/human conflicts
- Birdfeeders draw bears right to the windows of your home
- Bears can easily smell kitchen food through windows left open. They will enter your home through screens, slider doors and unlocked windows.
- Bear / human interactions can remain positive when people practice simple habits for living in bear country.
- Euthanizing local bears is not an intelligent solution. More bears will come.

Our community values its resident black bears, so please :

LOCK LOWER LEVEL WINDOWS and DOORS in BEAR COUNTRY

SUSPEND **BIRDFEEDERS** SO THEY ARE **INACCESSIBLE** TO BEARS

KEEP THE **GROUND CLEAR OF SEED** DEBRIS

IT'S THE LAW !
