Re: Info Update

TID BITS:

- Effective Monday, April 26 at 12:01 a.m., Pitkin County will move to Level Blue capacities on CDPHE Dial 3.0. The move to Level Blue comes after six consecutive days of case counts below 30 and decreasing positivity rates and is also the day after the resort closes.
- Dr. Brooke Allen has been leading the COVID testing effort here in Snowmass Village and other locations in the Valley. Dr. Allen has decided to close the tents at the Aspen Airport and Snowmass Village starting today. The demand for tests has dropped considerably. She and her team will continue to operate tents in GWS, Carbondale, El Jebel, and Aspen through the end of summer. If they see any increases in the volume at other tents over the next few months, especially any increase in TOSV residents testing at alternate sites, they will go ahead and resume testing here in the Village.
- The Fanny Hill concert stage will be going up next month. We are still working through logistics and a safety plan for the concerts, but we will have live music this summer on Fanny Hill. The first concert will be June 10. Party on!
- The Recreation Center started installing the new cardio equipment this past week. I was hoping the new equipment would make my workouts easier; alas, exercise is as difficult as ever.
- The Planning Commission is continuing to develop a State of the Comprehensive Plan Report. They continue to review the goals and policies.
- As part of the many events and activations planned for the summer, the Events Team is developing an art walk. We hope to have a few pieces of art installed at the Mall, Base Village and on the path to Anderson Ranch. While Tourism is taking care of the logistics, the SAAB will be asked to select the pieces.
- We have been cleaning storm drains along Wood Road this past week. While that may sound mundane, it is one of our primary tools to keep pollution from reaching Brush Creek.
- The Daly Townhome wall repair project is out to bid. Responses are due back April 27. We are still waiting to receive the necessary signed agreements from the homeowners.
- Summer is coming; check out all of the activities at the Recreation Center and Town Park including soccer camps, fencing camps, basketball, and tennis. This goes without saying, but all of the cool kids will be enjoying the park.
- Speaking of Summer events, RAGNAR is returning to the Village on June 11 & 12.
- Coffey Place had its first closing last week. The other 14 units will close over the next several weeks.

- We plan to receive responses from possible contractors for the Mall Regional Transit Center in about 3 weeks.
- Pitkin County has delivered over 23,600 vaccine doses through their mass clinic. At last count, over 60% of the eligible population is vaccinated in Pitkin County.
- Shocking news! Staffing continues to be an issue for local business. In order to help recruit folks, we will be hosting a summer job fair for local businesses.
- The Ice Cube artist continues to make progress on his piece. We don't have a delivery date yet, but we do now know how it needs to be installed.
- East West is taking the initial steps to get Building 12 into the planning process.
- Holy Cross has the fiber project out to bid.
- Town Clean-Up day is May 21.
- Our We cycle stations should be reinstalled next week.
- The next phase of the Carriage Way boiler project is getting close to being awarded.
- With ski season coming to an end, we will be taking over RFTA service to Brush Creek Park and ride next week.
